

Way to Amazonia

This is where the Amazonian saga of the [Euro-Sappho mailing list](#) starts from. The statistics oriented listowner posted a list of 'the ten most talkative women on Euro-Sappho', with names of those who had posted most frequently in the early euro-sapphic era. Then Stephanie, not on that list, commented:

"Let me get this straight. Out of dozens of euro-sapphists, ten women contribute 54%, five women contribute 38%, and two women contribute 25% of all messages?? Hmmm. And you want a prize? Let me see now. How about a six month walking tour of the Amazon, for ten?"

And from then on, we have been spinning the saga.
